OBJECTIVE

Motivated 3rd-year IT student specializing in DevOps, Cloud Infrastructure, and Network Administration. Hands-on experience building automated CI/CD pipelines, containerized microservices, and highly available AWS environments. Eager to contribute to scalable infrastructure while continuously advancing skills in Infrastructure as Code (IaC) and system monitoring.

PROJECTS & EXPERIENCE

Microservices Face Recognition Attendance System (Feb 2026 - Present)	Systems Architect & DevOps Engineer - Architected a distributed microservices ecosystem (Next.js, Node.js, Python FastAPI), improving scalability and efficiency by 35%. - Containerized 4 independent services via Docker and orchestrated the local development environment using Docker Compose. - Integrated PostgreSQL with pgvector for high-performance storage and similarity searching of high-dimensional facial embeddings. - Optimized real-time data streaming between the AI service and backend to ensure high accuracy and minimal check-in latency.
"Shoe Shop" E-commerce Platform (Dec 2025 - Feb 2026)	Team Leader & Backend/DevOps Engineer - Led an agile team in developing a dynamic full-stack e-commerce application requiring robust server-side execution. - Engineered a monolithic backend architecture to handle complex business logic utilizing Java Spring Boot and MySQL. - Established an automated CI/CD pipeline using GitHub Actions for code testing and Docker image building. - Provisioned and deployed the complete system on AWS EC2, configuring security groups to ensure high application availability.
Enterprise Network & Systems Infrastructure (2025 - 2026)	Network & Infrastructure Engineer - Designed a centralized network for 5+ retail branches, configuring OSPF Multi-area routing and DHCP Relay for unified IP management. - Deployed a PostgreSQL Master-Slave Replication cluster to guarantee High Availability (HA) and Fault Tolerance. - Architected a distributed CI/CD pipeline using Jenkins in a Master-Worker topology; provisioned a primary Jenkins server and a dedicated Ubuntu server agent to strictly isolate build environments.

SKILLS

- Cloud & DevOps:** AWS (EC2, S3, VPC), GCP, Jenkins, GitHub Actions, Docker, Docker Compose, Kubernetes (Basics), Terraform.
- Networking & OS:** OSPF (Multi-area), DHCP Relay, Static Routing, TCP/IP, Linux (Ubuntu, CentOS), Bash Scripting.
- Databases:** PostgreSQL (Master-Slave Replication, pgvector), MySQL, SQLite.
- Development & Security:** Java Spring Boot, Next.js, Node.js, FastAPI, AWS Security Groups, JWT Authentication, Selenium.
- Soft Skills:** Technical Leadership, Agile Workflows, Problem-Solving under pressure, Fast Learner.

EDUCATION

Ho Chi Minh City University of Transport (2023 - 2027)
Bachelor of Engineering in Information Technology | GPA: 3.5/4

CERTIFICATIONS & INTERESTS

- Certifications: AWS Certified Solutions Architect - Associate (Learning Plan in Progress), Google Cloud Computing Foundations (Completed).
- Interests: System Architecture Research, Cloud Technologies (AWS/GCP), Network Lab Configuration, Linux Administration.
